# Basic ToDo List

This is a basic ToDo List application developed during the MAD4B II UIU APP Forum Workshop in Spring 2024.

Description

This ToDo List app allows users to create tasks, mark them as completed, and delete them. It provides a simple and intuitive interface for managing tasks efficiently.

Screenshots

Features

- Add tasks with a title
- Mark tasks as completed
- Delete tasks
- Edit task titles
- Add notes to tasks

Technologies Used

- Flutter
- Dart

Getting Started

To get started with the app, follow these steps:

1. Clone this repository.
2. Open the project in your preferred IDE or text editor.
3. Run the app on an emulator or physical device.

How to Contribute

If you would like to contribute to the development of this project, feel free to fork the repository and submit pull requests with your changes.
